

Where to Get a COVID-19 Vaccine for Your Child

Kids as young as 6 months can now get their free COVID vaccine

Everyone 6 months and older should get vaccinated against COVID.

COVID vaccines for kids are available at pediatricians' and other doctors' offices, community health centers, rural health clinics, children's hospitals, public health clinics, local pharmacies, and other community-based organizations.

How to find COVID vaccines for your child

- Talk to your child's pediatrician or your family doctor
- Go to [vaccines.gov](https://www.vaccines.gov)
- Text your ZIP code to 438829
- Call 1-800-232-0233
- Scan the QR code

Why your child needs a COVID vaccine

COVID can be dangerous for children.

Vaccination is the best thing you can do to protect your child from the dangers of COVID.

The vaccines for children are safe, and they work well to prevent the worst outcomes of COVID:

- Severe illness
- Hospitalization
- Death

The vaccines now available for children ages 6 months through 4 years should provide the same protection.
