

Get Your Updated COVID Vaccine

Updated vaccines are now available for vaccinated people 12 and older to help protect against both the original virus and the Omicron variant.

For the best protection, get your updated vaccine.

If it's been 2 months since you completed your primary vaccination series or have gotten a booster, you should get an updated vaccine.

Completing your primary vaccination series means you got 2 shots of the Pfizer-BioNTech, Moderna, or Novavax vaccine, or 1 shot of Johnson & Johnson's Janssen vaccine.
